ABSTRACT

Hiring is a standout amongst the most essential choices that associations routinely make. While picking amongst inward and outside procuring, chiefs need to consider their own hierarchical condition, since a few situations support one technique over the other. Internal mobility is not new trend in employability that may possess various factors itself to make it happen. The victims are employees who may face certain obstacles. This study is one of the empirical works that has been made to identify various factors influencing the internal mobility and problems faced by the employees in making internal mobility happen. The result categorizes various factors and problems pertaining to internal mobility in employees' perspective adopting statistical measures.

Key-words: *Hiring, Internal mobility, Factors and Problems*
